CAMPUS SECURE+

Transforming Campus Safety at Scale
A Real-World Use Case: Weatherford Independent School District (WISD)

Weatherford ISD in Texas is pioneering the future of school safety. With over 8,000 students and faculty across 11 campuses, the district faced critical challenges—from limited security personnel to fragmented physical systems and rising cyber threats. In response, WISD deployed the **CAMPUS Secure+** platform services to revolutionize its approach to security and compliance.

Why Weatherford ISD Chose CAMPUS Secure+

WISD needed more than cameras and metal detectors—it needed a unified, intelligent platform capable of responding to today's complex threat landscape. **CAMPUS Secure+** delivered exactly that.

Unified Security Management:
CAMPUS Secure+ breaks down the silos between physical and digital security. With one intuitive dashboard, school officials gain real-time visibility into all activity—students, staff, assets, and network threats.

Real-Time Crisis Response:
Integrated BLE-based tracking, mobile alerts, geofencing, and automated lockdowns enable immediate and precise action during emergencies—whether it's a suspicious intruder or a medical event.

24/7 Cyber & Network Protection:
With round-the-clock monitoring, endpoint protection, and SIEM intelligence, WISD can now proactively defend against ransomware, phishing, and data breaches that threaten sensitive student information.
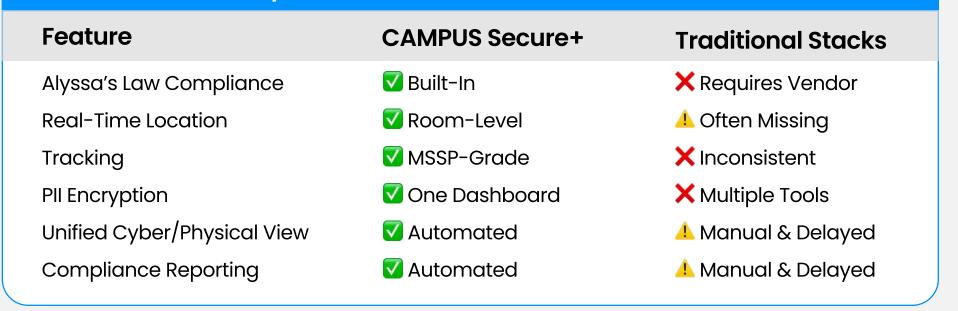

How We Solved WISD's Most Pressing Security Challenges

Challenge	Details	Solution
Limited Security Resources	Not enough staff to monitor large campuses.	**+LOCATE** automates tracking and alerts to reduce staff workload.
Fragmented Security Infrastructure	Legacy systems created emergency blind spots.	**CAMPUS Secure+** unifies alerts, badges, lockdowns, and monitoring.
Cyber Vulnerabilities	Outdated IT exposed systems to threats.	Managed security offers 24/7 monitoring, incident response, and protection.
Compliance Burden	FERPA and HIPAA compliance was costly and manual.	Built-in audit trails and biometric tools streamline compliance.

Why CAMPUS Secure+ Stands Out

Feature	CAMPUS Secure+	Traditional Stacks
Alyssa's Law Compliance	✅ Built-In	❌ Requires Vendor
Real-Time Location	✅ Room-Level	⚠️ Often Missing
Tracking	✅ MSSP-Grade	❌ Inconsistent
PII Encryption	✅ One Dashboard	❌ Multiple Tools
Unified Cyber/Physical View	✅ Automated	⚠️ Manual & Delayed
Compliance Reporting	✅ Automated	⚠️ Manual & Delayed

Tangible Outcomes Across 11 Campuses

✅ **Enhanced Visibility & Communication**
Real-time tracking, BLE badge alerts, and centralized dashboards empowered security teams to monitor all 11 campuses from a single pane of glass. Eliminating blind spots and communication silos.

✅ **Faster Response to Physical & Cyber Threats**
With instant lockdown triggers, mobile panic buttons, and 24/7 cyber monitoring, WISD significantly shortened response times—minimizing disruption and improving campus safety.

✅ **Reduced Operational Costs Through Unified Tools**
By replacing multiple disjointed systems with CAMPUS Secure+ and **+LOCATE**, the district streamlined operations, reduced vendor overhead, and freed up staff for mission-critical tasks.

✅ **Increased Stakeholder Trust & Regulatory Alignment**
Built-in FERPA and HIPAA compliance features—including encrypted data, biometric visitor check-ins, and audit-ready reports—bolstered transparency, trust, and board confidence.

Why It Matters
Every second matters in a school crisis. CAMPUS Secure+ empowers administrators, first responders, and IT teams with the tools they need to act—immediately, intelligently, and securely.

Ready to Secure Your District?
Let's partner to deliver a safer, smarter, and more compliant campus.
